Ankit Suresh Raut | Software Engineer

Fairfax, VA (Open to Relocation) | +1 571-224-4890 | ankitsureshraut@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Results-driven **Software Engineer** with 3.5+ years of experience designing scalable **distributed systems, backend microservices, and cloud-native applications**. Expertise in **Java (Spring Boot), Go, Python, AWS, Kafka, and event-driven architecture**. Proven track record of improving system uptime (98%+), reducing deployment incidents (40%), optimizing cloud infrastructure costs ($1K/month savings), and supporting high-volume applications handling **2M+ API requests/month**. Experienced in designing systems with strong focus on reliability, scalability and cost efficiency.

Skills

Programming Languages: Java, Go, Python, SQL
Backend Development: Spring Boot, REST APIs, Microservices Architecture, Distributed Systems, API Versioning
Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB, RDS, S3, CloudWatch), CI/CD, Docker, Kubernetes, Terraform, CDK
Messaging & Event Streaming: Kafka, AWS SNS/SQS
Databases: PostgreSQL, MongoDB, DynamoDB, Oracle
Testing & Monitoring: JUnit, pytest, Integration Testing, Testcontainers, Structured Logging, Observability
Architecture: Event-Driven Systems, Concurrency, Fault Tolerance, High Availability, Circuit Breaker, Retry Mechanisms
Methodologies: Agile, SDLC, Code Reviews, Design Patterns

Work Experience

PTC, Boston (Remote) | Software Engineer II **Feb 2026 - Present**

- Architected and led development of cloud-native Go microservices supporting high-availability distributed systems.
- Designed scalable backend systems on AWS (Lambda, API Gateway, RDS, DynamoDB, S3) achieving 99%+ uptime.
- Implemented event-driven workflows using asynchronous processing and service coordination patterns.
- Established API versioning standards and backward compatibility strategies across internal and external services.
- Introduced CI/CD automation with blue-green deployment strategies, reducing production incidents by 40%.
- Improved observability through structured logging, metrics, and distributed tracing, reducing MTTR by 30%.
- Optimized infrastructure utilization, reducing AWS cloud spend by $800–$1,000 per month.

Citi, USA | Software Engineer **Jan 2025 - Sept 2025**

- Developed and maintained **Java Spring Boot microservices** for high-volume financial transaction processing.
- Designed RESTful APIs with strict compliance to enterprise security and audit standards.
- Integrated Kafka-based event streaming to enhance real-time transaction workflows.
- Implemented idempotent request handling and retry mechanisms improving transaction reliability.
- Optimized SQL queries and indexing strategies, reducing transaction latency by 25%.
- Collaborated with cross-functional teams in an Agile environment to deliver scalable banking applications.
- Strengthened system resiliency through circuit breaker patterns and centralized logging.

LTIMindtree, Pune, India | Software Engineer P1 **Sept 2022 – Dec 2023**

- Engineered **Spring Boot microservices** handling 2M+ API requests/month with 98% uptime.
- Built REST APIs processing 30K+ daily transactions with rate limiting and API versioning.
- Improved distributed event throughput by 30–35% using Kafka and AWS SNS/SQS.
- Reduced production defects by 40% via integration testing and failure-handling strategies.
- Tuned SQL queries and indexing to significantly improve response times under concurrent load.

Zentek Infosoft, India | Software Developer **May 2021 - Aug 2022**

- Developed backend modules using **Java and Spring Boot** for enterprise workflow automation systems.
- Built REST APIs integrated with PostgreSQL databases.
- Assisted in cloud migration initiatives and Docker containerization efforts.
- Improved backend performance by optimizing database queries and reducing response latency.
- Conducted peer code reviews enforcing design and reliability standards.

Education

Master of Science, Computer Science **Jan 2024 - Dec 2025**
George Mason University, Fairfax, Virginia GPA: 3.67/4.0

Bachelor of Engineering, Computer Engineering **Jun 2018 - Apr 2022**
Pune University, India GPA: 9.30/10

Projects

Backend Orchestration & Workflow Platform

- Designed distributed backend orchestration service coordinating multi-stage workflows across microservices using asynchronous execution.
- Implemented parallel task scheduling and fault-tolerant processing achieving sub-2s latency under concurrent workloads.

Voice-to-Insights Distributed Pipeline

- Built event-driven backend system processing streaming audio into real-time searchable insights via scalable REST APIs.
- Developed asynchronous ingestion and processing architecture enabling horizontal scaling under continuous workloads.

AWS Multi-Account Landing Zone (CDK + Control Tower)

- Engineered infrastructure-as-code platform using AWS CDK to automate provisioning of secure multi-account cloud environments.
- Implemented governance guardrails and centralized observability improving operational scalability and compliance.

Certifications

- AWS Certified Developer – Associate (In Progress)
- Oracle Cloud Infrastructure AI Foundations Associate - 2023
- Oracle Cloud Infrastructure Data Science Professional - 2023
- Oracle Cloud Digital Assistant Professional - 2023
- Java Programming Masterclass (Java 11 & 17)
