

Ankit Suresh Raut | Software Engineer

Fairfax, VA (Open to Relocation) | +1 571-224-4890 | ankitsureshraut@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Software Engineer with 4+ years of experience building backend services, cloud applications, and distributed systems using Go, Python, Java, AWS, SQL, and modern web technologies. Experienced in developing scalable REST APIs, asynchronous workflows, cloud-native applications, and full-stack integrations with hands-on experience across AWS, Kafka, Databricks, Docker, Kubernetes, React, Angular, TypeScript, and Node.js.

Skills

Programming Languages: Python, Go, Java, SQL, JavaScript, TypeScript

Backend & APIs: Spring Boot, FastAPI, REST APIs, Microservices, GraphQL, WebSockets, API Design

Cloud & Infrastructure: AWS (Lambda, API Gateway, DynamoDB, RDS, S3, CloudWatch), Azure Databricks, Docker, Kubernetes, Terraform, AWS CDK, CI/CD

Data & Streaming: PySpark, Kafka, AWS SNS/SQS, Delta Lake, ETL Pipelines, Asynchronous Processing

Databases: PostgreSQL, MongoDB, DynamoDB, Oracle

Frontend: React, Angular, TypeScript, JavaScript, HTML/CSS, Node.js

Testing & Reliability: JUnit, pytest, Integration Testing, Testcontainers, Structured Logging, Monitoring, Observability, Metrics

Distributed Systems: Retry Logic, Idempotency, Fault Tolerance, Event-Driven Architecture, Concurrency, Scalable Backend Systems

AI & Automation: Hugging Face Transformers, NLP Pipelines, Pinecone, LLM APIs, Prompt Engineering

Developer & AI Tools: Cursor, GitHub Copilot, ChatGPT, Claude, Zapier, Lovable, Postman, Swagger/OpenAPI, Jira, Git

Methodologies: Agile, Scrum, SDLC, Code Reviews, Sprint Planning, Cross-Functional Collaboration

Work Experience

PTC, Boston, MA (Remote) | Software Engineer

Feb 2026 - Present

- Built Go-based backend services on AWS for workflow execution, asynchronous processing, and internal platform operations.
- Developed REST APIs using AWS Lambda, API Gateway, DynamoDB, RDS, and S3 supporting scalable backend workflows.
- Implemented Kafka/SQS-based retry workflows and structured logging to improve backend reliability and failure recovery.
- Developed internal operational tooling and TypeScript-based dashboard integrations for workflow monitoring and debugging.
- Improved CI/CD deployment workflows using automated validation and blue-green deployment practices, reducing production issues by ~40%.
- Added CloudWatch monitoring, metrics, and tracing dashboards, reducing debugging and incident resolution time by ~30%.

Citi, New York, NY | Software Engineer Intern

Jan 2025 - Sept 2025

- Contributed to Java Spring Boot microservices supporting transaction processing and backend workflow automation.
- Developed REST APIs with request validation, exception handling, and audit logging aligned with enterprise security standards.
- Assisted in Angular-based internal dashboard enhancements and frontend API integrations for transaction monitoring workflows.
- Integrated Kafka-based event streaming for asynchronous transaction updates and downstream processing.
- Improved SQL query performance and indexing strategies, reducing API response latency by ~25% under test workloads.

LTIMindtree, Pune, India | Software Engineer

Sept 2022 - Dec 2023

- Built backend APIs and PySpark data pipelines processing 1M+ records/day using Azure Databricks, SQL, and cloud workflows.
- Developed REST services and Angular-based frontend integrations supporting transaction processing and analytics workflows.
- Improved backend and data-processing performance by ~30% using query optimization, partitioning, and Kafka-based processing.
- Supported migration of enterprise applications and backend workloads from on-prem systems to cloud infrastructure.
- Reduced production issues through validation checks, structured logging, and integration testing improvements.
- Collaborated with backend and platform teams to improve API reliability, monitoring, and distributed processing workflows.

Zentek Infosoft, India | Software Developer

May 2021 - Aug 2022

- Developed and maintained Java-based backend features for workflow automation and enterprise business applications.

- Integrated REST APIs and PostgreSQL databases to support user operations, reporting workflows, and internal data exchange.
- Supported application deployment and environment setup using Docker and automated build workflows.
- Troubleshoot backend issues, optimized database interactions, and improved API stability across production environments.

Education

Master of Science, Computer Science

George Mason University, Fairfax, Virginia

Jan 2024 - Dec 2025

GPA: 3.67/4.0

Bachelor of Engineering, Computer Engineering

Pune University, India

Jun 2018 - Apr 2022

GPA: 9.30/10

Projects

AI Image Processing Platform

- Built Go-based backend APIs integrating AI image-generation workflows with AWS S3, Redis caching, and asynchronous processing.
- Developed React and TypeScript frontend flows for image upload, prompt submission, and generated image preview.
- Designed secure backend-managed upload pipelines using private S3 buckets and REST APIs for generated image delivery.

Real-Time Voice Insights Pipeline

- Built Python-based ingestion pipeline processing streaming audio into searchable real-time insights and summaries.
- Developed asynchronous workflows and REST APIs for ingestion, transformation, indexing, and queue-based processing.
- Built React frontend interfaces for real-time insight visualization and API-driven search workflows.

AWS Multi-Account Infrastructure Platform

- Automated AWS account provisioning and infrastructure setup using AWS CDK, Terraform, and Control Tower.
- Implemented IAM guardrails, centralized logging, monitoring standards, and internal dashboard integrations across cloud environments.
- Developed lightweight React-based operational dashboards for infrastructure monitoring and multi-account management workflows.

Certifications

-
- AWS Certified Developer – Associate (In Progress)
 - Oracle Cloud Infrastructure AI Foundations Associate - 2023
 - Oracle Cloud Infrastructure Data Science Professional - 2023
 - Oracle Cloud Digital Assistant Professional - 2023
 - Java Programming Masterclass (Java 11 & 17)
